Dear Stephen and all of the fine folks at ZED audio,

After having played around with my Gladius for about a week, I am superbly happy with it. I currently have it connected to a set of middle of the road speakers, as my nice component set is out due to a bad mid range speaker. This is everything I expected and more!! Thank you all for the fine work and craftsmanship. I am truly impressed.

When I get my CDT component speakers reinstalled I will post a review on several of the internet forums that I visit and email a link so that you can read my review.

Thank you once again,
Chris Hofeldt
