

Dear Stephen,

Just wanted to send you a note to say thank you, the "Minilith" is amazing. I really think I need to get new subs in a proper enclosure to really appreciate all the amp has to offer. It is very clean and accurate. I have not really driven it as if yet and it seems to put out more than enough power to my subs. The installer was very impressed with it, he has not taken it apart and looked inside but from what he could see he was impressed. Also wanted to say that along with the product I really appreciate all your help and exemplary customer service, it is a rarity these days. It was a pleasure to deal with you and I would do so again without hesitation and have and will continue to tell all who are interested about you and your company. Here is a link to a website I participate in with a profile of my system, for you to have a look at if you like <http://tcdogg.carstereo.com> .

Sincerely

Tim Clark
